Title: AgroScapeLab Quillow – A Landscape Lab
Date: Friday, 16th March 2018
Time: 8:30 – 17:30 / 18:45
Location: Quillow Region, Brandenburg
Languages: English
Costs: 30 € (Lunch included)

Participants

Max. 50 participants, open to all conference participants (registration required, first come first serve)

Thematic Outline

Landscape research focuses on the often complex interplay between various landscape elements, integrating methods and expertise from different scientific disciplines, and considering long-term effects. To that end, ZALF started joint research and monitoring activities in the Quillow region, about 90 km north of Berlin, in the 1990s. Here arable fields prevail, but forested areas, wetlands and small lakes are quite abundant as well. The ZALF activities have since then been subsequently extended and continue doing so, covering aspects of agronomy, soil science, hydrology, biology and microbiology, socio-economics etc. at different temporal and spatial scales. The field trip will present some of these activities and provides a nice opportunity for discussing concepts of landscape research in the context of specific examples.

Time Plan (first draft)

08:30	Departure from Berlin Adlershof (conference venue)
10:30	Arrival in the Quillow region CarboZALF site, Dedelow research facilities Lunch break at Dedelow Instrumented field sites
17:30	Estimated arrival at Berlin Tegel Airport
18:00	Estimated arrival at Berlin Main Station
18:45	Estimated arrival at Berlin Adlershof Conference Venue / Hotel

Information and Handouts will be provided
